

How a Leading CLINICAL Practice Used ZIBRIO To Drive Fall Prevention

A Clinical Practice

which covers 822 primary care patients and sits within a larger health system

Using ZIBRIO's Stability™ Pro scale and BalanceCare™ software, clinicians were empowered to help patients reduce their fall risk, thereby improving their quality of life.

"The scale creates a buzz amongst patients. They're interested to use it."

- Nurse, Primary Care Practice.

Figure 1. Testing with the Stability™ Pro scale

470% increase

in identifying at-risk patients who are 3x more likely to fall

100% of patients

received data-driven personalized fall prevention care

"Patients are definitely more open to counselling after they get their ZIBRIO score."

- Primary Care Nurse

An Opportunity To Improve Senior Care

Precision Fall Risk Measurement

During a two-month pilot, the primary care practice weaved in ZIBRIO's precision fall risk measurement to improve senior care and staff engagement.

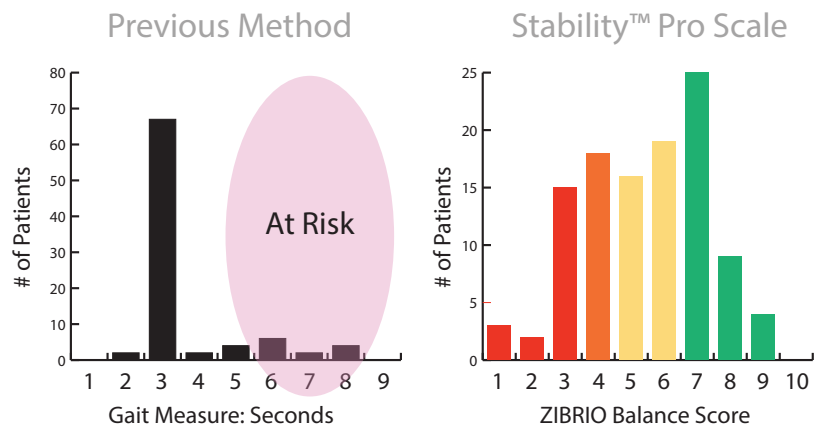

Each patient completed a 60 second assessment and the healthcare practitioner used BalanceCare™ software to guide counselling and treatment of their patients across the 6 pillars of balance.

This fall reduction program enhanced patient preventative care while also providing new revenue, growth opportunities, and distinguishing personalized care for better outcomes.

Results for Better Care

Within 2 months of use:

470% increase
in identifying at-risk patients

100% of patients
tested received data-driven personalized fall
prevention care

“Patients are definitely more open to
counselling after they get their ZIBRIO
score.”

“BalanceCare™ helps me coach my
patients, especially if they're a bit
in denial.”

- Primary Care Physician

How a Leading SENIOR LIVING Group Used ZIBRIO To Drive Fall Prevention

A Senior Living Group

that covers 2000 assisted living & memory care residents

Using ZIBRIO's Stability™ Pro scale, residents were empowered to reduce their fall risk, thereby improving their quality of life.

“[ZIBRIO] is the way to prevent falls and increase wellness and longevity in our communities. It's a win for everyone”

- Stephanie, SVP Resident Care

Figure 1. Testing with the Stability™ Pro scale

Identified 23% more
at-risk residents

77% of tested residents improved or maintained
their balance score in 2 months
with rehab available

“Residents are very curious about their [ZIBRIO] scores and want to improve them.”

- Adam, Dir. of Nursing

An Opportunity To Improve Senior Care

Precision Fall Risk Measurement

During a 2-month pilot, 48 assisted living facilities weaved in ZIBRIO's precision fall risk measurement to improve senior care and staff engagement.

Residents completed a 60 second assessment monthly and rehab services were provided as needed.

The senior living and rehab companies used ZIBRIO to provide distinguished personalized care that goes beyond the current standard of care.

They are recognized Stability Diamond sites.

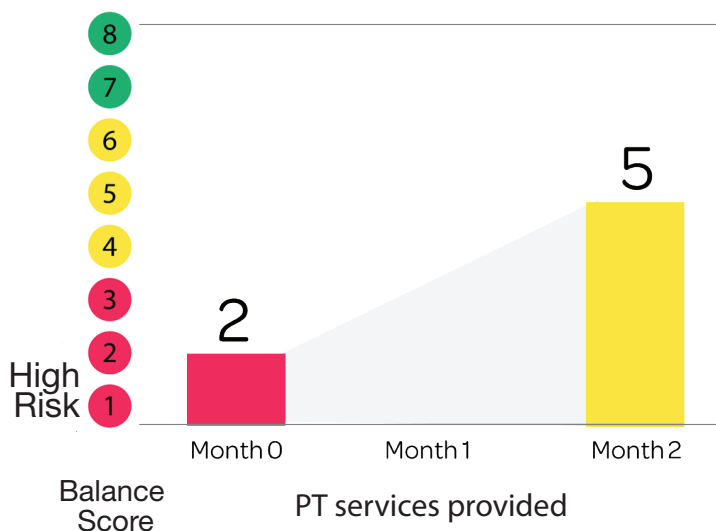

Results for Better Living

Within 2 months of use:

Reverse decline

78 yrs resident reduced fall risk by 2.2x

31% of residents improved

their Balance Score in 2 months (of those tested)

7% of high risk residents

Shifted to a lower risk category

“The Stability Scale allows us to enhance resident quality of life, increase engagement and improve quality scores.”

- Laura, Regional Dir. Operations
